

Microsoft Azure Portal interface showing the App Services overview page. The left sidebar contains navigation links: Create a resource, Home, Dashboard, All services, FAVORITES, All resources, Resource groups, App Services, Function App, SQL databases, Azure Cosmos DB, Virtual machines, Load balancers, Storage accounts, Virtual networks, Azure Active Directory, Monitor, Advisor, and Security Center.

The main content area displays the App Services overview page with a search bar, filters (Location, Pricing Tier, App Service Plan, Subscription, App Type), and a list of app services. A modal window titled "App Services" is open, showing a description, free training from Microsoft, and useful links.

Microsoft Azure Portal interface showing the "Create Web App" wizard. The wizard is titled "Create Web App" and includes a description of App Service Web Apps. The "Project Details" section shows the subscription, resource group, and instance details.

Project Details

Select a subscription to manage deployed resources and costs. Use resource groups like folders to organize and manage all your resources.

Diagnose and solve problems

Our self-service diagnostic and troubleshooting experience helps you identify and resolve issues with your web app.

Application Insights

Application Insights helps you detect and diagnose quality issues in your apps, and helps you understand what your users actually do with it.

App Service Advisor

App Service Advisor provides insights for improving app experience on the App Service platform. Recommendations are sorted by freshness, priority and impact to your app.

Microsoft Azure

Hey, Node developers!

Your app service is up and running.
Time to take the next step and deploy your code.

Have your code ready?
Use deployment center to get code published from your client or setup continuous deployment.

Don't have your code yet?
Follow our quickstart guide and you'll have a full app ready in 5 minutes or less.
